

1 • THE PROBLEM

Long hours, a manual process, and the client feels it.

Theme	What we heard on the calls
Manual reconciliations	"The other thing I have to do is reconcile expenses. That is on me rather than the administrator, because I am generally the only person who knows what every meeting was for." Fund manager, call 1 "A head of accounting or a finance team who are consolidating data across fifteen different fund administrators manually, they are struggling enormously to do that work." Ylookup, call 2
Manual checking of the work product	"From a quality control perspective there just is not any. ... Frankly I no longer read what they send. I put it through an AI coding tool first, and it produced a forty-point memo of what was wrong." Fund manager, call 1 "I cannot trust any number I get from them, so I have to check everything, which adds its own iteration." Fund manager, call 1
Manual iteration with the client	"The real problem is that it took six or seven turns to get there. That is the problem I am trying to solve. Nothing is ever right first time." Fund manager, call 1 "What I care about is the count of turns. That is the drag on my time." Fund manager, call 1
Context that never reaches the ledger	"One of our investors has a side letter where the management fee counts against their called capital. They consistently got that calculation wrong, and we had to get a senior manager involved to explain how it should flow." Fund manager, call 1

LONG HOURS

"About a day to two days. They work hard and they work late."

MANUAL PROCESS

"They rely on the same infrastructure, which is human labour, and humans get tired and avoid the hard work."

CLIENT SATISFACTION

"His view was that any outsourced fund administrator would be this bad." Errors, not price, are why roughly a third of funds changed administrator in 2024.

2 · OUR UNDERSTANDING OF THE WORKFLOW · QUARTERLY GL REPORTING

From bank PDFs to a signed-off statement, and the loop that follows.

the loop the fund manager pays for: "the delay is the loop"

3 · WHERE CLAUDE ALREADY WORKS, AND WHERE WE ARE BUILDING

An autonomous brain behind QC3, and a visual QC gate in front of it.

GOAL minimise manual hours · raise EVAL accuracy to the fund's own standards · an always-on context watcher, a situational agent

4 · THE SAME GATE ON REAL MIGRATION DATA

Four levels of the same deliverable, scored as tests passed out of 66.

18,929 rows of real migration data. 39 arithmetic and structure checks, mapped to ISA 500, PCAOB, DAMA and ILPA.

L5 · with the GraphDB

GraphDB performance: to be updated. The register CSV stands in for the graph until the graph's export passes the contract test, row for row.

100%

of the 4 errors planted to test the checks were caught by the check meant to catch them

5 · ONE EMAIL CHANGES THE TERMS

The investor emails an amended side letter. The register updates itself; the next fee run is checked against the new terms.

THE EMAIL · MON 6 JUL 2026

FROM

Head of Fund Operations, Trentcombe Fund Investors LLC

SUBJECT

Amended and restated side letter, effective 1 July 2026

- X Fee rate 0.85% to 0.75% p.a. (clause 2(a))
- Y Basis: Commitment to Invested Capital (2(b))
- Z Fee offset 80% to 100% (2(c))

New notices contact; capital account statement now due in 45 days (5(a))

Attachment: the executed side letter, PDF

"Could you confirm the terms register has been updated before the Q3 fee run?"

THE REGISTER · TWO CLOCKS

Trentcombe's March 2024 facts are closed: valid to 30 Jun 2026.

Successors open: valid from 1 Jul 2026, recorded 6 Jul 2026, received via the email.

Source: side letter SL-TRENTCOMBE-2026-01, clauses 2(a), 2(b), 2(c), 5, 6.

ASK THE GRAPH

rate on 15 May 2026 → 0.85%, side letter 2024
rate on 15 Aug 2026 → 0.75%, side letter 2026, via the email

Nothing is deleted. The Q2 calculation stays right; Q3 must change.

THE Q3 DRAFT, CHECKED

Against the June register: 11 of 11 pass. The draft agrees with what the administrator knew.

AGAINST THE JULY REGISTER, SAME SCHEDULE, SAME CHECKS

- b** TC01 rate applied 0.85% vs 0.75% · 3,479.00
- b** TC02 basis Commitment vs Invested Capital · 4,348.50
- b** TC05 offset 80% vs 100% · 1,468.93
- a** **TC09 net fee overcharged · USD 9,296.43**

7 checks still pass, and are shown as passes. Every line names the investor, the clause and the amount.

"Same schedule, same checks. The only thing that changed is that the graph read one email."

Synthetic scenario on real anonymised investors. During the demo the email is sent live to the mailbox the Gmail connector watches.

APPENDIX • THE TERMS REGISTER

Eighteen investors, one real entity, one row per investor: what was agreed, where it says so, and from when.

Shown live from the register. Commitments are backed out of the ledger's own allocation shares; the side letter is one row, one clause, one date.

Investor	Commitment (USD)	Share	Fee rate p.a.	Basis	Inside commitment	Source	Clause	Valid from
